

FIBERGLASS PRODUCTS

“The ease of installation, cost and time savings we’ve experienced using Irvin, Inc.’s fiberglass products has made moving from metal easy.”

Irvin’s Family of Fiberglass Products

Panel-less Frames - Our patented fiberglass panel-less billboard frame offers many beneficial features. Light-weight and rust resistant, these frames are ideal for wooden structure upgrades and new builds alike. Offering all of the structural integrity of steel alternatives, the StormTamer™ is engineered to 150 mph wind loads. No extra kits or components needed for an insert vinyl — it comes complete. And it arrives partially pre-assembled to make installation a snap.

Catwalks* - Another first in the industry, our patented fiberglass catwalk, FiberCAT,™ offers many of the same benefits as our fiberglass panel-free frame. No rusting. No rotting. Plus, they can be built on site with just a mallet and drill. So light-weight, shorter catwalks can be hand-lifted and placed directly onto the arms of low boards.

Skirting* - This alternative to metal and wood billboard skirting offers many benefits. Our fiberglass skirting, FiberSkirt,™ will not rot or rust and never needs to be painted. And it’s lighter than metal or wood, making it easy to handle and more economical to ship. Various corrugations, finishes and colors are available and installation only requires a washer and screw.

Ledger Arms* - Our fiberglass ledger arm offers many beneficial features. Light-weight and rust resistant, these ledger arms are also ideal for wooden structure upgrades and new builds alike. Offering all of the structural integrity of steel alternatives, the Irvin, Inc. fiberglass ledger arm is engineered to support 50 PSF and 500 lb. concentrated load when installed correctly. No extra kits or components needed to complete.

**Steel versions are available*

StormTamer

- 75% lighter than steel
- Rust resistant
- Non-conductive
- No welding
- Easy to fabricate
- 64 PSF/150 mph wind load

FiberCat

- 75% lighter than steel
- Rust resistant
- Non-conductive
- No welding
- Easy to fabricate
- 500 lb.. concentrated load

FiberSkirt

- Easy color matching
- Various corrugations and finishes
- Non-conductive
- Never needs paint
- Rust resistant
- Lightweight

Ledger Arm

- Lightweight and rust resistant
- Accommodates steel or wood structures
- Ability to retro-fit non-standard billboards
- Can be extended for dual-face boards
- Supports 50 PSF and 500 lb. concentrated load
